EVERY CHANNEL.
ONE PLATFORM.

About us

We are a Southern African FinTech company driven by a passion for delivering customer-centric innovation that creates lasting value today and into the future.

Established in 2007, we support businesses across every channel—online, in-store, or hybrid—spanning numerous industries.

We handle the intricacies of running a payment system enabling our customers to process secure, lightning-fast transactions effortlessly while providing them with clear, real-time access to their transaction data. With our automated reconciliation services, our customers gain peace of mind, knowing that every cent is accurately accounted for.

With hundreds of partnerships in our ecosystem, we are the central hub that connects it all. Our ecosystem is easily accessible, giving you everything you need in one place.

Flexibility is at our core. Our customers can choose the financial service providers, digital product ranges, and end-user devices that best fit their needs—all seamlessly integrated on our central platform.

We continuously introduce new technologies, payment types, and scalable efficiencies to give our customers a technological advantage for exponential success.

Our Purpose

Creating and delivering smart transaction solutions and services to enrich our clients' experience.

Who do we serve?

We help businesses thrive with value-driven FinTech products and services, that can adapt and scale to meet evolving business requirements.

Trusted by these leading brands

Our customers include many of Southern Africa's leading brands and they trust us to deliver innovative solutions, exceptional service, and lasting value.

Seattle Coffee Company understands that, while its business is coffee, customer service is equally as critical. To this end, we partnered with Transaction Junction to make both payments and tipping a simple and easy process.

Seattle Coffee Co

At Unipos, we have placed a great focus on client-to-client business relationships, and Transaction Junction has only helped us to improve this. Their payment gateway is very user-friendly, and clients tell me they love the speed and ease of use of the system.

Unipos

Time and time again, TJ goes out of their way to make our lives, and those of our retailers, easier. Their solutions and their people are top-notch.

SPAR Group

In terms of quality of service, availability of solutions and ease of doing business, TJ comes out tops every time!

Hatton's Hardware

TJ gives us a one-stop solution that spans Symphony, cloud, P2PE, and home deliveries. Using their eCommerce solution is a no-brainer.

Nando's

What do our customers have to say?

SIMPLIFY COMPLEX SYSTEMS

One platform that addresses all in-person and online payment needs creating hyper-efficiency and operational cost-saving.

PEACE OF MIND, ALWAYS

Our platform is built on unmatched stability and industry-leading security, ensuring transactions are processed with the strictest security protocols.

EXPAND YOUR BUSINESS

Utilise future-ready FinTech products and enable an expansive ecosystem of providers to reach new markets, unlock new opportunities, and ultimately grow your business.

CREATE AMAZING EXPERIENCES

Our solutions eliminate friction, supporting a seamless and enjoyable checkout experience to delight your customers.

GENERATE ADDITIONAL REVENUE

We offer multiple ways for customers to expand their revenue streams, from commission-earning opportunities and UX-driven tipping to monetising screen space on Android devices for marketing purposes.

ENSURE FINANCIAL ACCURACY

Access real-time transaction data and utilise automated reconciliation services across all channels to ensure financial accuracy and integrity.

1.

POS INTEGRATIONS

Unlock a bouquet of services seamlessly integrated into your point of sale

Our customers enjoy a fast, secure, modern platform where essential systems communicate effortlessly.

- Enhance operational efficiencies
- Reduce manual errors
- Elevate customer experiences
- Unlock new revenue opportunities

How it works

We integrate into your POS system, bridging the gap between POS and payments through a powerful, secure, and deeply connected FinTech platform.

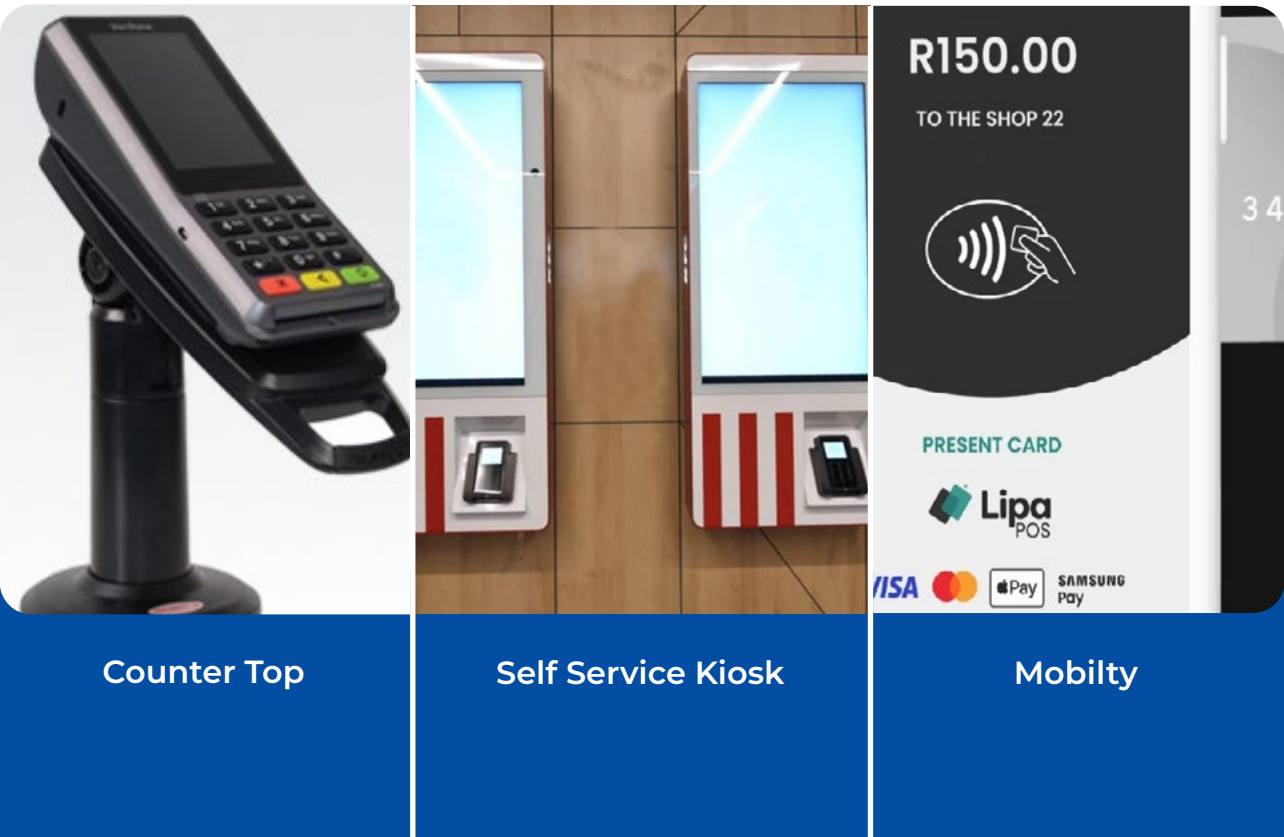

Our software facilitates effortless communication between your POS and payment terminal, eliminating manual processes and reducing human errors—such as entering incorrect payment amounts.

We power a comprehensive payment ecosystem, enabling our customers to choose from a list of payment providers, supporting our customers to sell Value-Added Services (VAS), and enabling our customers to process integrated cash withdrawals and deposits at the till. Additionally, we offer industry-specific mobile solutions supported by feature-rich Android innovation.

Experience these features

- Dynamic currency conversion
- Automatic acquirer failover
- Device agnostic
- PCI P2PE listed
- AWS cloud-based interface
- Machine learning enabled transaction monitoring
- Faster transaction speed
- Industry-leading stability
- Industry-leading transactional success rate

CHANNELS

INTEGRATED PAYMENT

Embrace the smoothest payment experience

Providing merchants with peace-of-mind through our highly effective payment offering, we offer a cost-effective industry-differentiating solution that ensures transactions are delivered at the POS, securely and on-time.

Issues with non-integrated payment platforms

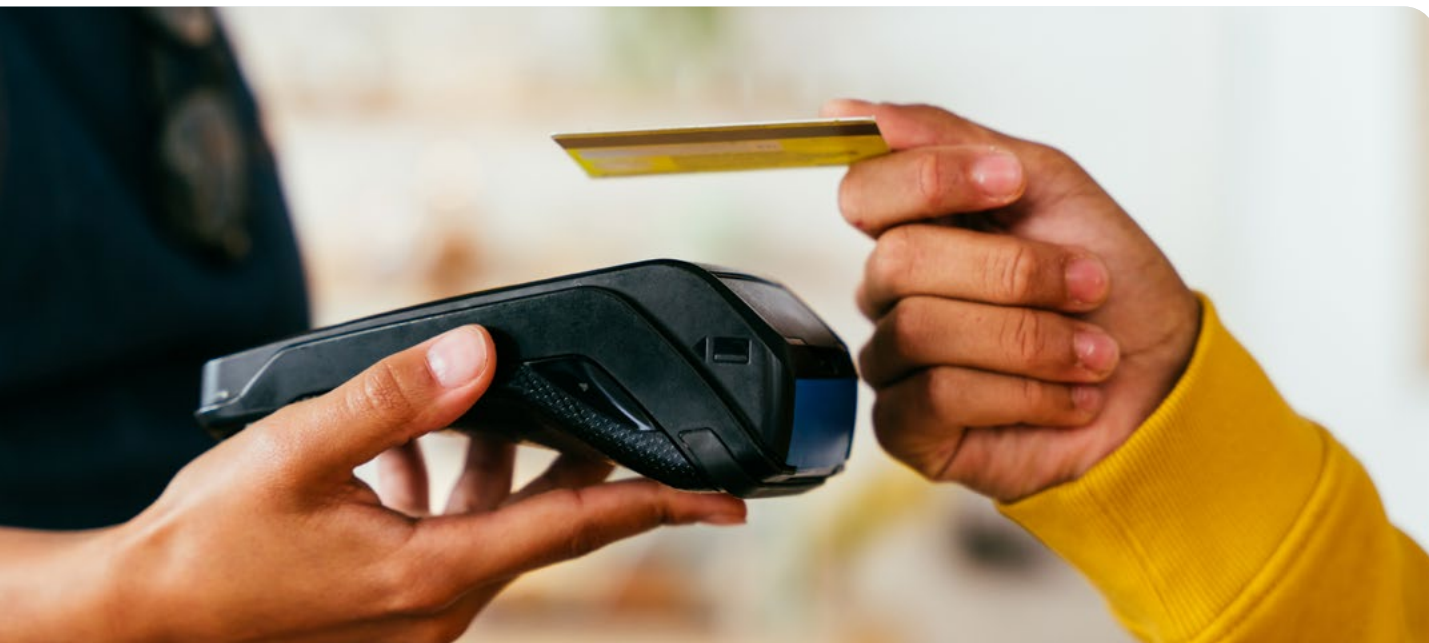

Merchants often rely on separate systems for accepting payments through payment terminals and managing operations via a point of sale. This compartmentalisation forces sales staff to manually input payment amounts in to the card terminal, opening scenarios for accidentally mis-charging customers. Furthermore, the transaction speed is typically slow, prone to transaction declines, and exposes businesses to significant security vulnerabilities.

The solution

We connect all the parties involved in a transaction, creating one fully integrated modern system. Our software is PCI P2PE validated ensuring the highest level of payment security.

Benefits

- Eliminate manual payment errors
- Fewer declined transactions
- Lightning-fast transactions
- Industry-leading security

Accept card and alternative payment

CARDS AND WEARABLES

Accept debit and credit card payment

Securely accept all major card schemes through contact and NFC contactless payment methods.

ALTERNATIVE PAYMENT

Accept alternative payment

Reduce friction in the checkout process by enabling your customers to pay using the alternative payment method of their choice.

- Digital Payment Apps
- QR Payment apps
- Buy Now Pay Later
- Online Vouchers and Gift Cards
- Mobile Wallets
- Credit Providers
- Instant EFT
- Loyalty Providers

DYNAMIC QR CODE

Accept scan to pay

The simplest way to accept payment from multiple alternative payment providers through a single integration.

The Dynamic QR Code, displayed on the card terminal, is uniquely generated for each transaction and is encoded with the transaction amount.

The customer uses their smartphone to scan the QR code through the payment application of their choice, and makes a payment following the usual steps in their chosen app.

CARD TOKENISATION AND INCREMENTAL AUTHORISATION

Reduce non-payment for services requiring balance payments

A useful tool for car rental business and hotels, this solution minimises the risk of non-payment for services requiring future-dated balance transactions by securing encrypted customer card information during an initial transaction.

After the card has been encrypted, businesses can compliantly debit or credit the card without the customer or card being present.

VALUE-ADDED SERVICES

Earn additional revenue by selling Value-Added Services

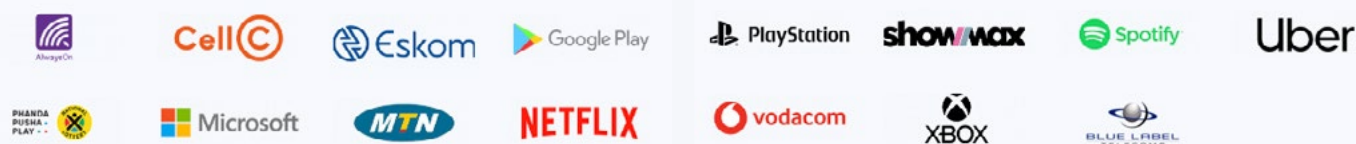

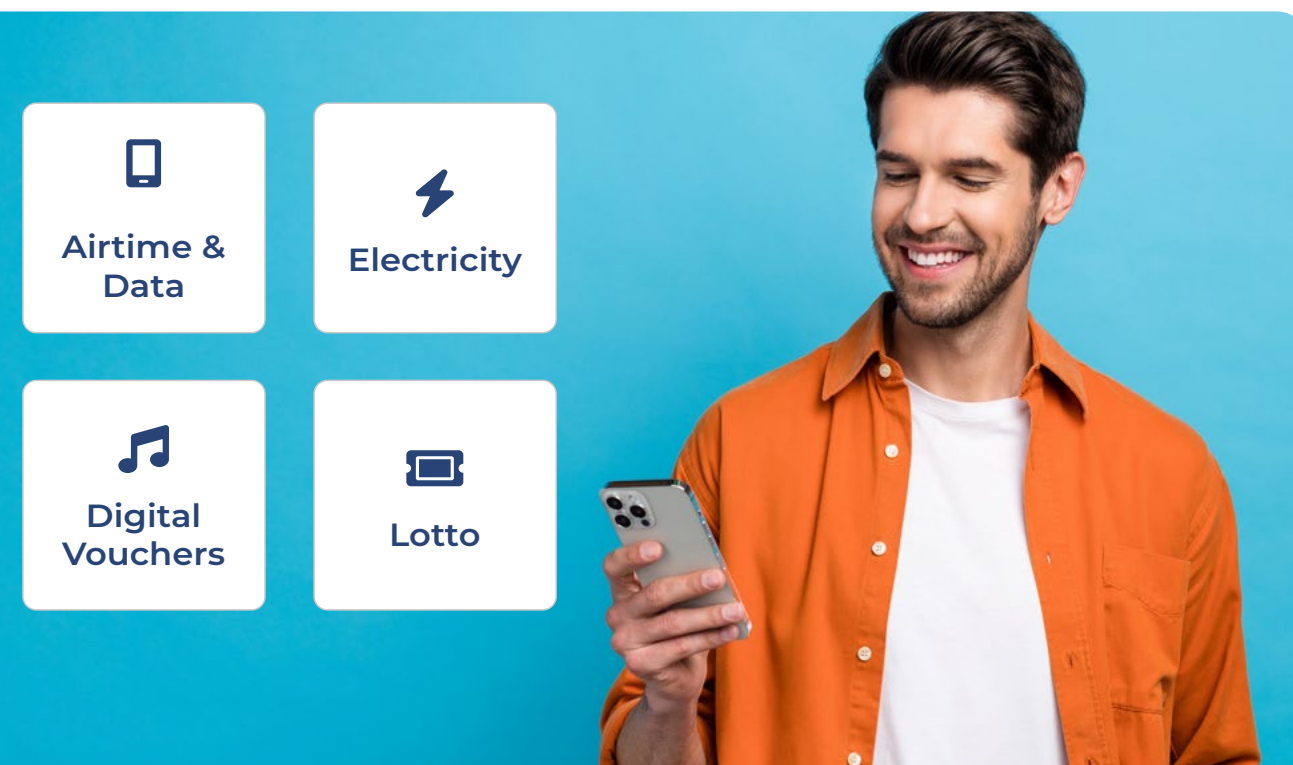

We empower retailers to boost their earnings by selling products like airtime, data, prepaid electricity and more - right at the till - without compromising checkout speed.

How it works

We empower our customers with instant access to an ecosystem of VAS providers at no additional cost, offering competitive commission rates and continuous expansion to drive more value from day one.

Benefits

- Open additional revenue streams
- Single integration to access multiple providers
- Enhance customer experience
- Increase foot traffic
- Gain a competitive edge

CASH WITHDRAWALS AND DEPOSITS

Provide convenience by processing cash withdrawals and deposits at the till

Enable your customers to withdraw and deposit cash into their banks accounts, right from the till, and earn revenue for facilitating this service!

How it works

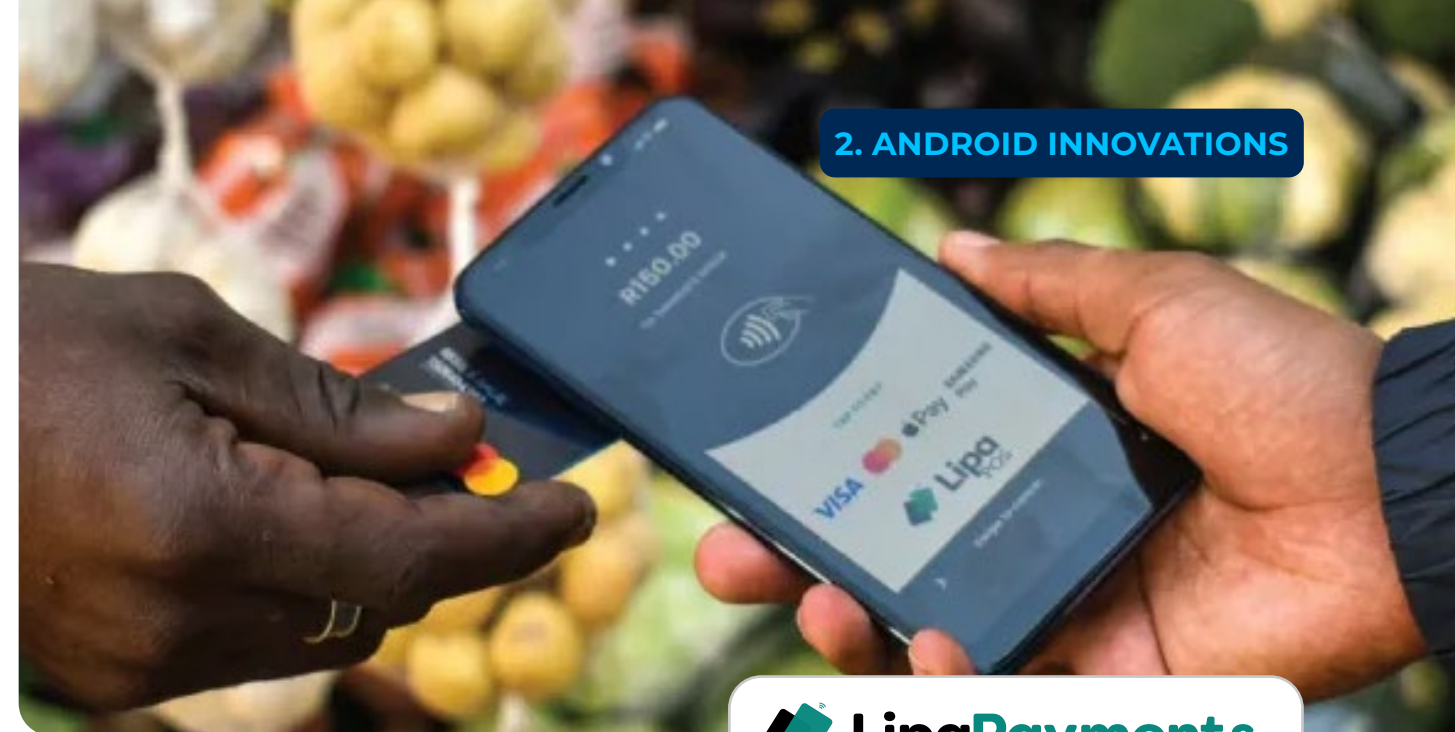

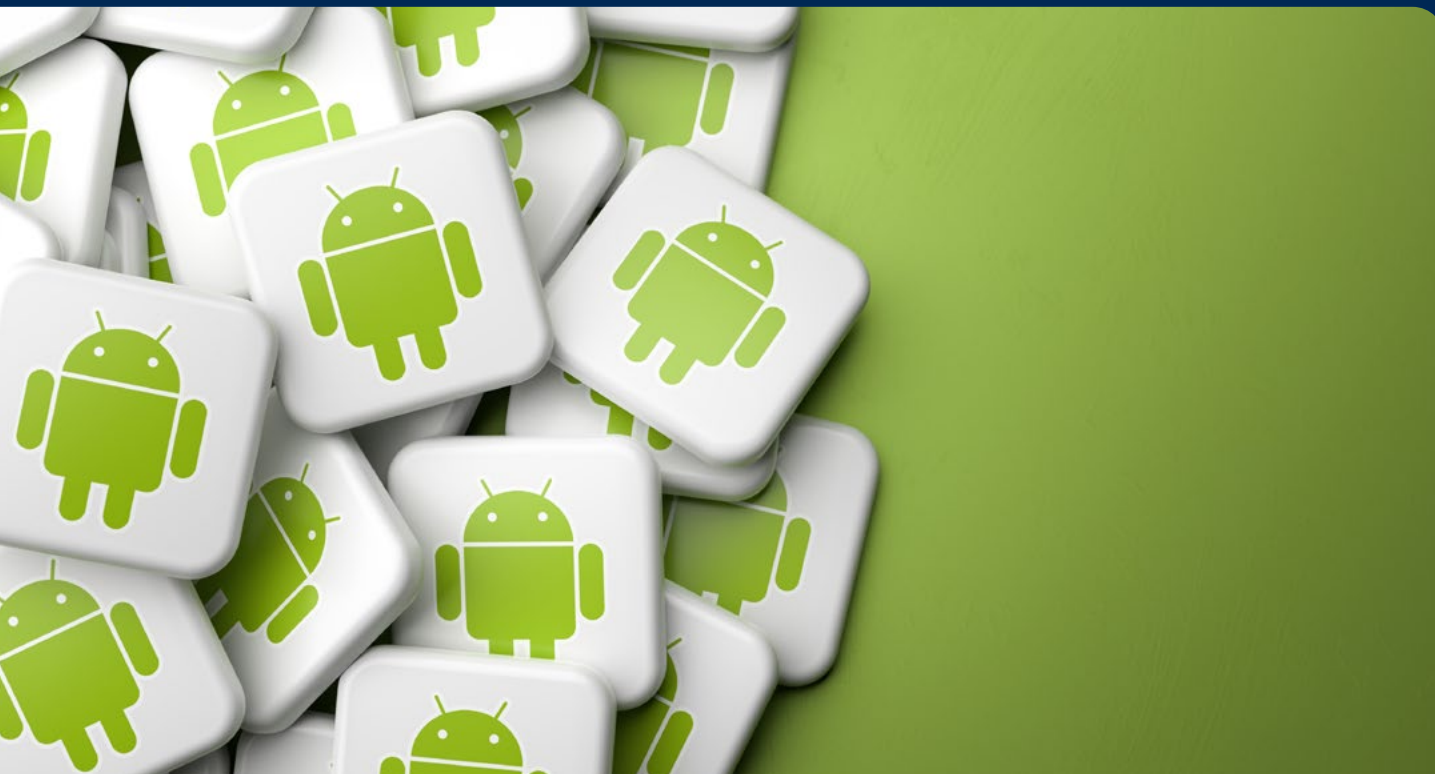

Earn commission every time your customers withdraw or deposit cash at the till, whilst offering them the convenience of skipping a trip to the bank or ATM. Balance enquiries can also be easily enabled alongside this service. Customers simply need to bring their Visa or MasterCard bank card and cash for deposits.

2.

ANDROID INNOVATIONS

Embrace true business potential with the power of Android

Harness feature-rich Android technology to accept payments anywhere, with a flexible platform that rapidly evolves with your business needs.

2. ANDROID INNOVATIONS

SOFTPOS

Accept contactless card payment through a regular Android device

Innovated by Lipa Payments, we enable merchants to accept NFC card payment acceptance directly through a smartphone (Tap on Phone) or other Android device (OS 11+) - reducing the reliance on traditional payment hardware.

Implementation options

Intent:

Incorporate SoftPOS into your existing Android app to accept contactless card payment.

While label payment app:

Utilise a full payment app, - customisable to align with your brand strategy.

USE CASES

- Payment on the go
- Integrated till experience
- Payment on delivery
- Queue-busting
- Back-up device

2. ANDROID INNOVATIONS

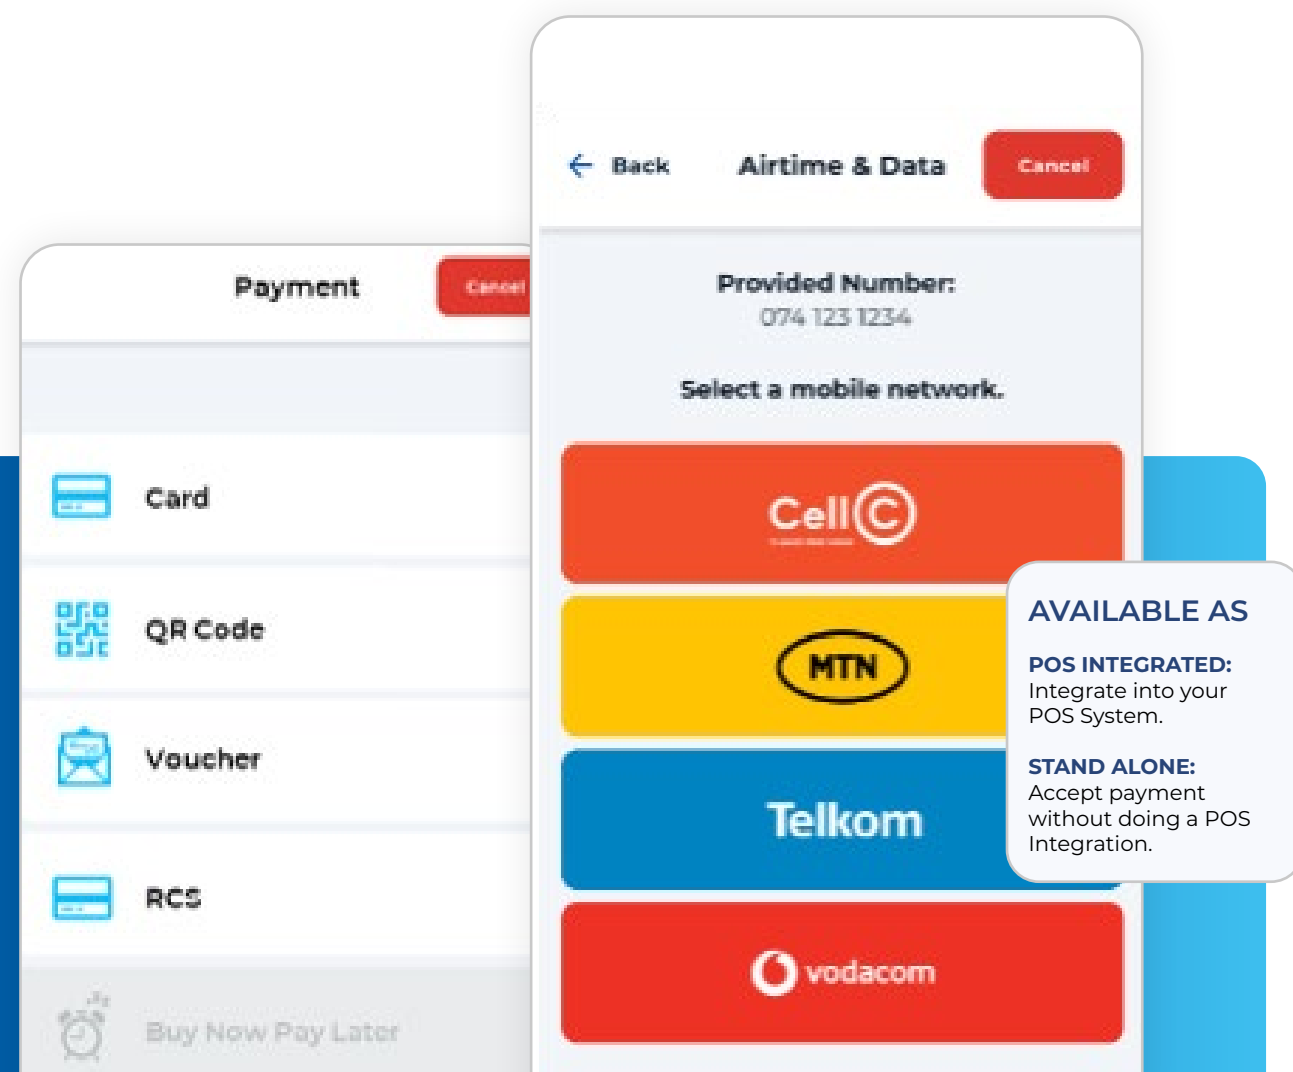

TJ PAY

Experience ultimate flexibility through our in-house payment and VAS application

Our in-house payment app, TJ Pay, offers unmatched flexibility in enabling new features - allowing for rapid innovation to meet your business needs faster.

How it works

Harness the power of TJ Pay for the fastest access to new payment and VAS providers. Plus, turn your payment terminal into a dynamic marketing tool by displaying ads and promotions directly on the screen. With TJ Pay on Android, the possibilities are endless.

2. ANDROID INNOVATIONS

PAY@ SOLUTIONS

Mobile payment solutions for restaurants, deliveries and fuel stations

Our smart Pay@solutions empower you to accept integrated payments away from the POS.

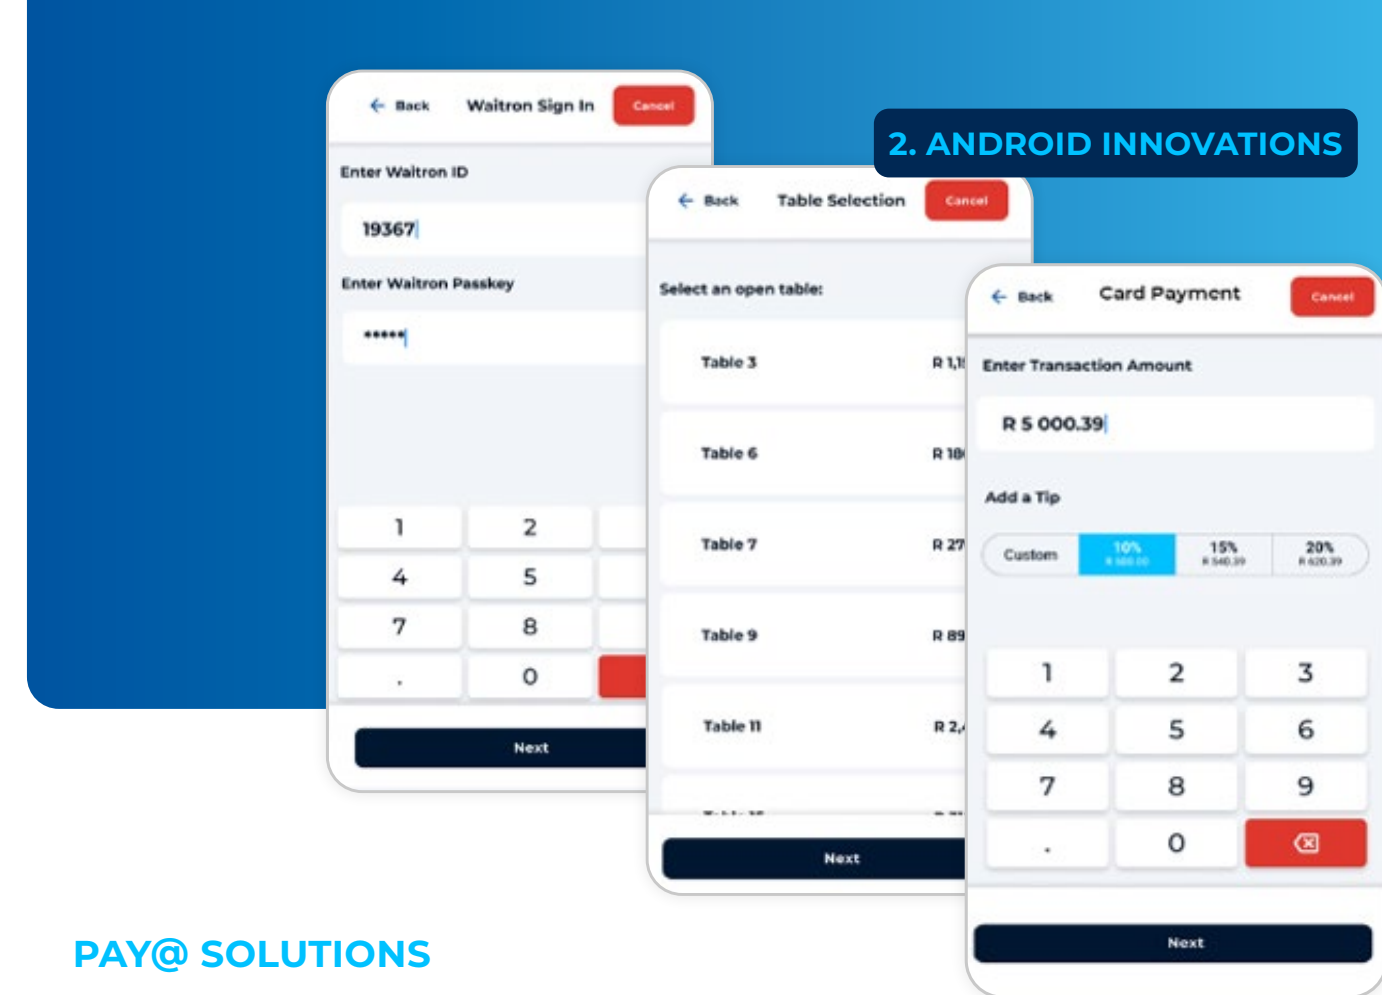

How it works

This highly customisable platform allows your staff to select a POS-integrated reference number on the card terminal - such as a **table or order number** - allowing it to automatically retrieve the transaction amount from the POS and ensure seamless two-way communication.

This flexible platform also supports industry-specific functions like **tippling, bill-splitting and employee sign in.**

Benefits

This solution enables staff to complete POS integrated payments, without making back-and-forth trips to the POS - enhancing the overall customer experience, and speeding up sales times.

USE CASES

Restaurants
(Pay@Table & Pay@ Counter)

Fuel stations
(Pay@Pump)

Delivery businesses
(Pay@Motorbike).

AVAILABLE AS

POS INTEGRATED:
Integrate into your POS System.

STAND ALONE:
Accept payment without doing a POS Integration.

3.

ONLINE PAYMENT

Power up your online business

Our checkout is built for speed, simplicity, and security, ensuring a frictionless shopping experience that keeps customers coming back.

3. ONLINE PAYMENT

CARD PAYMENT

Accept debit and credit card payment

Securely accept all major card schemes.

ALTERNATIVE PAYMENT

Accept alternative payment

Reduce friction in the checkout process by enabling your customers to pay using the alternative payment method of their choice.

CARD TOKENISATION AND INCREMENTAL AUTHORISATION

Enable customers to save card information for future payments

Allow your customers to securely save their card information for future payments, facilitating convenient repeat purchases. This enhances the customer experience by streamlining the checkout process while maintaining high security standards.

Creating a frictionless online payment experience

As an online retailer, your top priority is providing customers with a seamless shopping experience—but accepting payments securely is a growing challenge. You need a solution that protects sensitive payment information while maintaining trust, without adding complexity to the checkout process.

At the same time, speed is everything. Customers expect instant transactions, and any delays or payment failures can lead to abandoned carts and lost sales. Getting paid quickly and reliably is crucial to your cash flow and overall success. Partner with a payment processor that understands this.

Experience these features

- Dynamic currency conversion and multi-currency processing
- AWS cloud-based software
- Machine learning enabled transaction monitoring
- Recurring billing
- Faster transaction speed
- Industry-leading stability
- Fewer transaction declines

Implementation options:

- Branded secure payment pages that enable a congruent customer journey
- Enterprise REST API interfaces

PAYMENT LINKS

Generate payment links

Generate and send secure payment links to your customers, directing them to your branded payment page - no online store required.

How it works

Merchants can quickly create a payment link with a set amount and expiration date, then share it with their customers. When the customer clicks the link, they're seamlessly guided to your branded payment page - simple and hassle-free.

BRAND CUSTOMISABLE

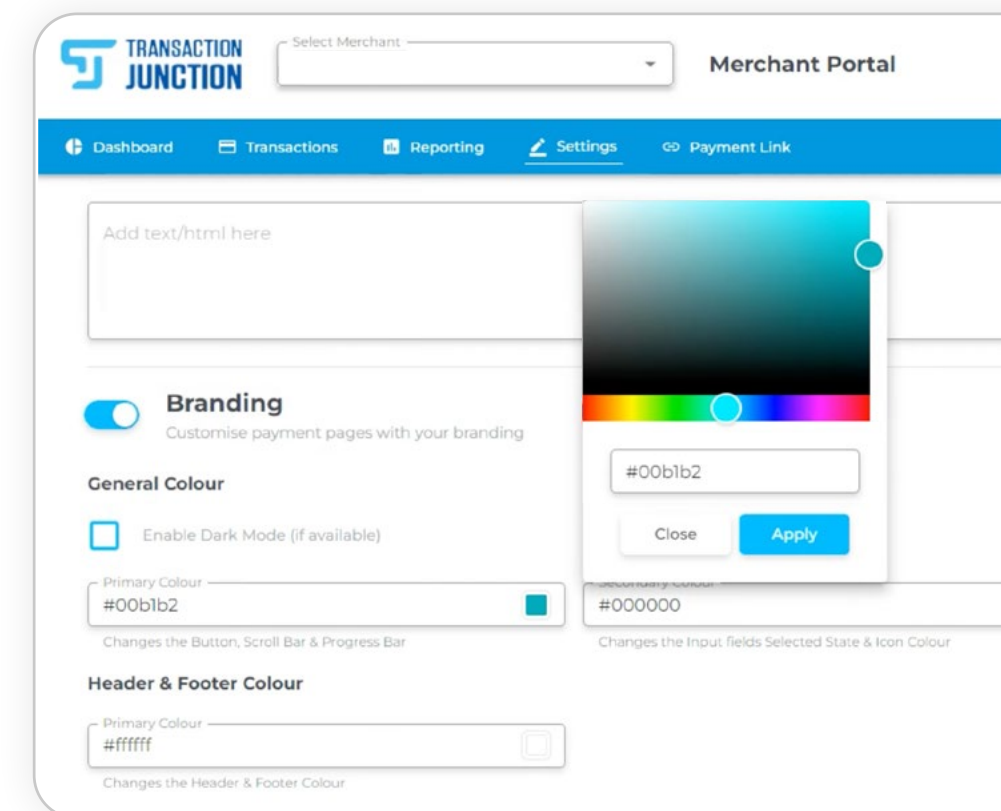

Customise the online payment page

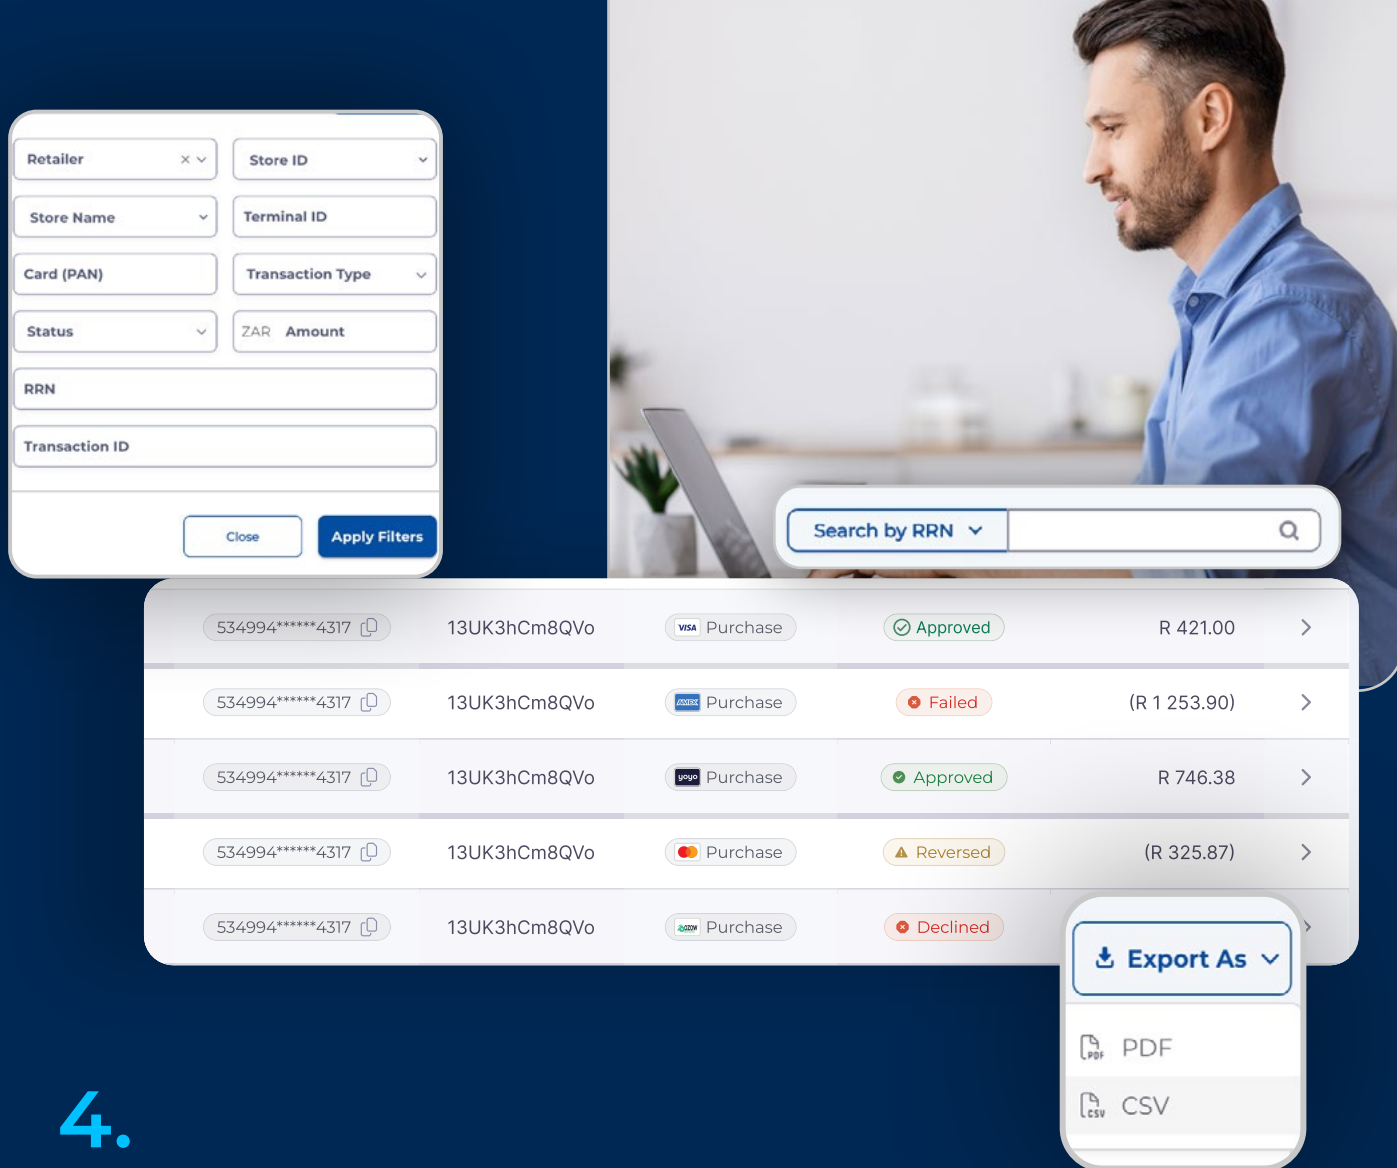

With our flexible payment page customisation, you're in control. Create a seamless, branded payment experience that instills trust and enhances customer confidence.

Tailor the payment page

Configure settings for your payment page according to:

- Legal copy
- Payment page URLs
- Enable web hook authentication
- Add support URLs or information
- Customise your branding

6.
RECONCILIATION

Have peace of mind knowing every transaction is tracked and accounted for

Say goodbye to tedious, error-prone manual reconciliation processes with the help of TJ Recon.

Our advanced reconciliation platform automates this critical task, ensuring accuracy whilst saving you time and effort—so you can focus on what truly matters: growing your business.

INTRODUCING TJ RECON

Turning complexity into clarity

The financial payment ecosystem is complex—and it’s only becoming more intricate. Whether you’re managing a single store or operating a large enterprise, reconciling transactions can feel overwhelming. TJ Recon simplifies this process by automatically reconciling payment transactions across your entire estate (in-person, online or hybrid).

How it works

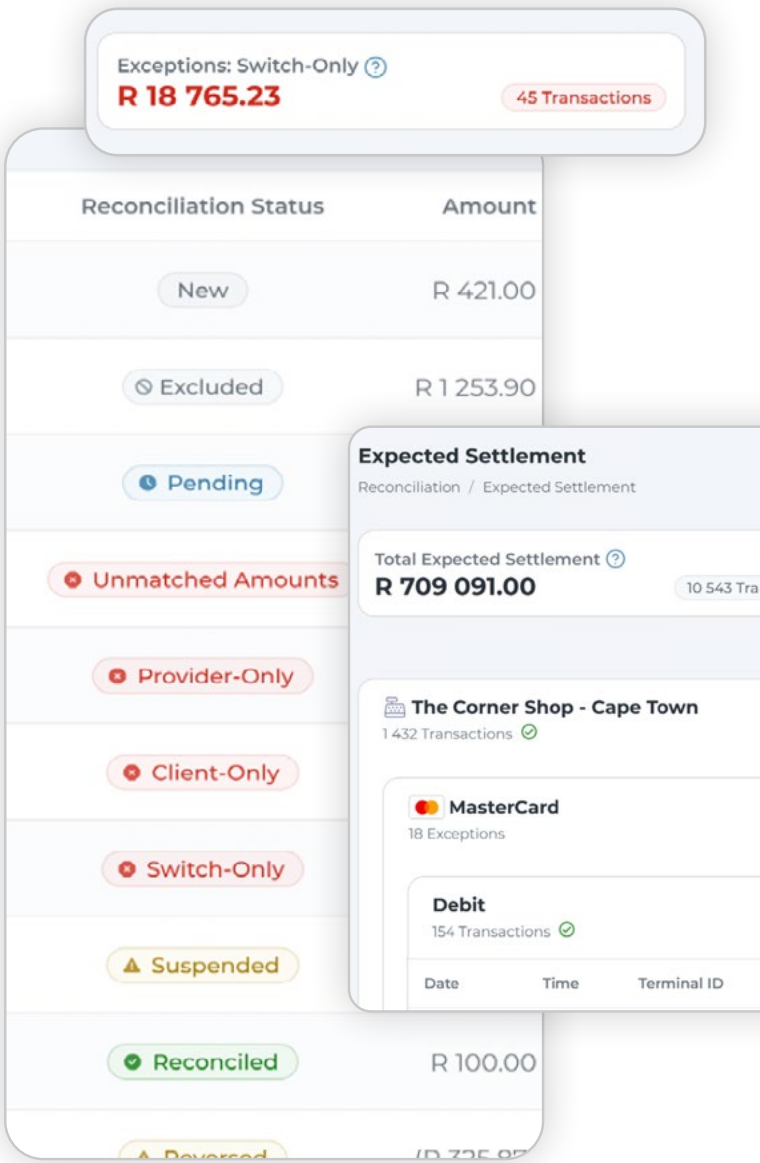

Our advanced reconciliation engine meticulously interrogates and compares transactions between the Client and Provider, and provides clear visibility. With results displayed on a user-friendly, dynamic interface, you gain complete control over your financial data.

Experience these features

- Monitor key metrics on a dedicated dashboard page
- Drill down into different levels, including stores, card schemes, and individual transactions
- Apply filters and search for specific transactions with ease
- Generate and download customised reports tailored to your needs

View dedicated pages for

- **Transactions:** view the reconciliation status of individual transactions
- **Exceptions:** view discrepancy transactions
- **Expected settlements:** know your expected settlement amount

Our customer support isn't just about solving problems – it's about creating exceptional experiences.

- 24/7/365 support
- Dedicated Service Delivery Management
- Field support service
- Defined pro-active escalation processes
- Multi-service monitoring and automated notification systems:
